PROFESSIONAL SUMMARY (EN)

Fullstack Developer with strong experience in Laravel, React, and Python (FastAPI/Django). Skilled in designing, developing, and deploying scalable systems, APIs, dashboards, and enterprise applications.

Demonstrated ability to deliver high impact solutions for healthcare institutions, government sectors, and private clients. Focused on clean architecture, performance optimization, and practical results.

RESUMEN PROFESIONAL (ES)

Desarrollador Fullstack con sólida experiencia en Laravel, React y Python (FastAPI/Django).

Especializado en el diseño, desarrollo y despliegue de sistemas escalables, APIs, dashboards y

aplicaciones empresariales. Comprobada capacidad para entregar soluciones de alto impacto en el

sector salud, organismos estatales y clientes privados. Orientado a la arquitectura limpia, optimización del rendimiento y resultados reales.

CORE STACK

Laravel, PHP, React, TypeScript, Python, FastAPI, Django, NestJS, MySQL, PostgreSQL, WordPress & WooCommerce.

ADDITIONAL TECHNOLOGIES

Vue.js, Node.js, Flutter, Dart, Firebase, TailwindCSS, Docker, Kubernetes, Git, GitHub, GitHub Actions,

Linux, REST APIs, CI/CD, Postman.

DETAILED EXPERIENCE (ATS)

Software Engineer – Hospital Celia Sánchez Manduley (2024–Present)

- Designed and implemented software solutions for healthcare workflows.

- Built internal tools for process automation and data handling.- Improved reliability and performance of existing institutional systems.

- Provided technical support and system maintenance for medical departments.

Independent Developer – Freelance (2022–Present)

- Delivered fullstack solutions for private clients across multiple industries.

- Developed multi■module systems with dashboards, authentication, and database management.

- Built and deployed production■ready applications with Laravel, React, Python and WordPress.

- Provided academic and technical advising for thesis and master's students.

Developer – Ministry of Health (2016–2024)

- Developed and maintained internal government systems.

- Participated in modernization of institutional platforms and data systems.

- Ensured robust operation of mission critical software.

IT Instructor – Ministry of Education (2011–2014)

- Taught computer science fundamentals, MS Office, and Visual Basic.

- Trained advanced students in programming and problem solving.

FEATURED PROJECTS (EXPANDED)

1. FastAPI + React Admin Dashboard:

- Developed a complete admin dashboard with authentication, charting, and role based access.

- Implemented modular FastAPI backend with optimized endpoints.

- Integrated React + TypeScript UI with secure API communication.

- Built reusable components to enhance productivity and maintainability.

2. Warehouse Management System (Laravel + React):

- Designed inventory, warehouse and product modules with business logic.

- Implemented movement tracking, CRUD operations and error free UX.

- Integrated React UI with Laravel REST API using Axios and state management.

3. Multivendor E-commerce Platform (WordPress + WooCommerce):

- Built a scalable marketplace supporting multiple vendors and automated product flows.

- Customized WooCommerce modules, payment processing and vendor dashboards.

- Optimized performance and security for real production usage.

4. DroneMed – REST API with NestJS:

- Developed a robust backend to manage medical drones, missions and tracking.

- Built PostgreSQL schemas, validation layers and service modules.

- Ensured clean architecture and future scalability.

5. GestoRem – Flutter Mobile App:

- Developed a remittance management app with real■time Firebase integration.

- Built UI screens, authentication and transaction tracking modules.

- Ensured responsive design and smooth user flow.

6. Portfolio (React + TypeScript):

- Built a modern multilingual portfolio with animations, theming and optimized performance.

EDUCATION

Licenciatura en Informática – Universidad de Granma (2019–2025)

Bachiller Técnico en Informática – IPI Rubén Bravo Álvarez (2005–2008)

KEY ACHIEVEMENTS

- Delivered 12+ internal systems for public institutions.

- Built dashboards and REST APIs used by 300+ users.

- Improved efficiency of institutional workflows through automation.

- Strong expertise in system architecture, API development and production deployment.
