Luis Alberto Guisado Lavañino

Fullstack Developer | Laravel · React · TypeScript · Django · .NET

Manzanillo, Granma, Cuba · Remote work
bethocubans1990@gmail.com · pushodev.vercel.app · linkedin.com/in/luis-alberto-pushodev · github.com/PushoDev

SUMMARY

Fullstack developer with 8+ years of experience building and maintaining production systems with Laravel, React, TypeScript, Django and .NET. I design REST APIs, clean architectures and microservices, and take my own products from idea to deployment: a local marketplace, a multi-warehouse ERP/POS and mobile apps with Expo. I am expanding into Blockchain (Solidity, Foundry). Looking for remote fullstack or backend/frontend roles on teams that value quality and continuous learning.

SKILLS

Frontend	React, Next.js, TypeScript, Vue, Inertia.js, Tailwind CSS, MUI, Vite
Backend	PHP/Laravel, Python/Django, FastAPI, Node.js/NestJS, .NET/C#, REST APIs, JWT, microservices
Data	PostgreSQL, MySQL/MariaDB, SQL Server, SQLite, Redis
Mobile & desktop	React Native, Expo, Flutter; Tauri and Rust (learning)
DevOps & quality	Docker, Linux (VPS), Git, GitHub Actions, Pest, Vitest
AI & automation	Telegram bots, chatbots, generative AI
Web3 (learning)	Solidity, Foundry, OpenZeppelin

EXPERIENCE

GIAvantech Softwares — Full stack developer — Sep 2026 – Present
Joinville, Brazil · Remote

- Frontend and backend development with React, Node.js, Django and PostgreSQL.
- Design and integration of REST APIs and microservice-oriented services.
- Integration of generative AI and workflow automation through agents and Telegram bots.
- Maintenance and evolution of production web applications, focused on performance and security.

Innovasoft Colombia — Full stack developer — Feb 2026 – Mar 2026
Remote

- React components integrated with the API, and support for .NET 5 services with business logic in SQL Server stored procedures (T-SQL).
- Worked with a team distributed across Latin America.

Hospital Celia Sánchez Manduley — Software engineer — Feb 2024 – Oct 2026
Manzanillo, Cuba

- Designed enterprise microservices to streamline medical data flows.
- Built asynchronous processing pipelines to automate processes across departments.
- Optimized indexing in relational databases, reducing response times in critical operations.
- Internal automation tools and technical support for medical departments.

Independent developer — Full stack — 2022 – Present
Manzanillo, Cuba

- End-to-end systems for private clients: a multi-warehouse ERP/POS and a marketplace in production with Laravel and React, plus an online store with Next.js.
- Mobile apps with React Native and Expo (in development) and projects with Django and WordPress.
- Technical and academic advising for thesis and master's students.

Sistemas de Infraestructura Institucional — Software developer — Aug 2016 – Mar 2024
Manzanillo, Cuba

- Refactored legacy monolithic platforms into maintainable web systems.
- Developed scalable backend solutions with safe support for high concurrency.

EARLIER EXPERIENCE

Ministry of Education — IT instructor 2011 – 2014
Computer science, Microsoft Office and Visual Basic; trained advanced students.

Ministry of Health — Software developer (internship) 2008 – 2010
Work placement after graduating from IPI Rubén Bravo Álvarez.

SELECTED PROJECTS

- **GolfitoShop (founder)** — Local marketplace in production: provider and admin panel, zone-based ads, memberships, Telegram bot and an API v1 for mobile apps. Laravel, React, Inertia, PostgreSQL.
- **Multi-warehouse ERP / POS** — Inventory with real per-batch cost, sales with commissions, purchasing, transfers, shift-based cash closing and multi-currency (USD/CUP/MLC), with a Telegram bot. Laravel, React, MariaDB.
- **GolfitoShop Apps (in development)** — Customer and Panel mobile apps with React Native and Expo, a typed client generated from OpenAPI, push notifications and OTA updates with EAS.
- **DayClosure (in development)** — Installable, offline ERP/POS for desktop and mobile, with Tauri (Rust + React) and SQLite.
- **Re & Re** — Remittance and top-up platform (delivered technical test). Django REST Framework, JWT, PostgreSQL and React. github.com/PushoDev/re-remesas

EDUCATION

University of Granma — Engineering degree 2018 – 2022

IPI Rubén Bravo Álvarez — Technical Baccalaureate in Computer Science 2005 – 2008
